WHAT WE DO

Leave the systems to us. You run the business.

For Irish small businesses: we connect the tools you already use, automate the copying between them, and keep it all running every month.

HOW IT WORKS

Built once, then kept running.

We work in the tools you already use, and stay on to keep them working.

Step 1

Fixed price per piece

Connect

The tools you already use, connected so each figure is typed in once, and what gets in the way fixed.

- Bookings, payments, accounts and your CRM connected, where staff retype data
- Every enquiry in one logged record, with a reply tracked against each
- Analytics, ad tracking and consent, set up and tested together
- A new site or landing page, where the site is the problem
- Speed, search and accessibility fixes

Step 2

Fixed price per build

Automate

The jobs that repeat, run on a schedule. Where no tool fits, we build one.

- Quotes, invoices, reports and follow-ups
- Every run logged; a job that keeps failing opens a ticket
- Custom software: booking, payments, portals and internal tools
- Documented and handed over

Step 3

One monthly fee

Run

We keep it running, fix it when it breaks, and report on it every week.

- Tracking checked against live events every month
- A weekly report: enquiries, sales and what came back
- Every enquiry logged in your client portal
- Monthly re-scans, with your evidence and compliance record kept current
- With ads: Google and Meta managed against a written checklist
- A weekly office hour and a quarterly review

Alongside

One fixed price, then kept proven in Run

Compliance: Secured and proven

One programme. We find every gap from outside, fix it along with the basics insurers ask about, and prove it with a second scan.

- Everything the scan finds, fixed, with DMARC, cookie consent and a privacy notice that matches the site
- Two-step sign-in on every staff account, a backup with a tested restore, and an incident plan with a practice run
- A second scan with every finding closed and dated, and a score against the NCSC's Cyber Fundamentals, Basic level
- An evidence pack for your insurer and your customers' security questionnaires

Code we write for you is yours, documented and handed over. Websites and ad accounts are built on your own accounts, in your name.

WHAT WE FIND

Most problems are visible from outside.

We checked 400 Irish small businesses on 2 October 2026. These are three of the commonest findings.

93%
of their mail domains do not tell inboxes to refuse email forged in their name

30%
of their websites set tracking cookies with no consent tool at all

41%
of their websites have no link to a privacy notice on the homepage

DNS lookups on the mail domains of 400 Irish small businesses across six trades, and 103 of their websites loaded in Chrome.

THE CHECK

• SAMPLE FINDINGS, MADE-UP DOMAIN

A report on what anyone can see.

No access needed. Every finding comes with the evidence, how serious it is, and the fix. Two of them, as the report shows them:

URGENT

Anyone can send email as @wrenfield.example

The domain's DMARC policy tells receiving servers to deliver mail that fails its checks. A fake invoice or refund request "from" the business would reach its customers' inboxes.

```
_dmarc.wrenfield.example  "v=DMARC1; p=none;"
```

Fix: turn on DMARC reports, confirm every service that sends as the domain, then move the policy to quarantine and reject.

HIGH

An enquiry cannot be traced to the ad that brought it

Analytics counts visits. Nothing records a form sent or a phone number tapped, so the ad account cannot tell which searches produce customers and spends as if none do.

Fix: record each enquiry as a conversion, through the cookie banner, and send it to the ad platforms.

RECENT WORK

What we have built.

CUSTOM SOFTWARE

Smart Space

The installer's diary, inside the checkout.

WEBSITE AND INTEGRATIONS

SmartCare Living

Every enquiry sent four separate ways.

CUSTOM SOFTWARE

Built for one trade

Deposits, client records, the diary and the till, with each day's takings sent to Xero or QuickBooks.

Smart Space and SmartCare Living share a managing director, and we will put you in touch with him.

Talk to us.

Tell us the business and its website, and ask for a check. We reply by the end of the next working day.
